SUMMARY

Motivated Computer Science undergraduate with strong fundamentals in frontend development and problem solving. Passionate about building responsive, visually appealing websites and currently expanding skills in Webflow and modern UI design. Seeking a Webflow Specialist Internship to contribute to real-world client projects while growing as a web developer.

PROJECTS

Abalone Age Analysis

Python · Machine Learning · Data Analysis

Developed a predictive model to estimate abalone age using physical measurements such as shell size and weight. Applied statistical analysis and machine learning techniques to model biological growth patterns and improve age prediction accuracy.

Hotel Management System

C++/Java · DBMS · OOPS

Built a system to automate hotel operations including room booking, customer management, billing, and check-in/check-out processes. Improved operational efficiency by reducing manual workload and ensuring organized data handling.

Cooking Recipe Portal

Developed a database-driven portal using MySQL and DBMS concepts to store, search, and manage recipes across categories, cuisines, and dietary preferences. Designed a relational schema for ingredient tracking and optimized SQL queries for efficient filtering and analysis of popular recipes.

EDUCATION

2024 - Present	B.Tech in Computer Science Engineering at SRM University AP	(GPA: 8.5/10.0)
2024	Class 12th (Board)	(950/1000)
2022	Class 10th (Board)	(536/600)

SKILLS

Programming	C, C++, Python
Web Development	HTML, CSS, JavaScript
Core Concepts	Data Structures & Algorithms (DSA), DBMS, SQL
